

2016-17 Program Assessment Report

Management B.S. Accounting Option

Mission, Objectives & Learning Outcomes

Oregon Tech Mission

Oregon Institute of Technology, an Oregon public university, offers innovative and rigorous applied degree programs in the areas of engineering, engineering technologies, health technologies, management, and the arts and sciences. To foster student and graduate success, the university provides an intimate, hands-on learning environment, focusing on application of theory to practice. Oregon Tech offers statewide educational opportunities for the emerging needs of Oregonians and provides information and technical expertise to state, national and international constituents.

Core Theme 1: Applied Degree Programs

Oregon Tech offers innovative and rigorous applied degree programs. The teaching and learning model at Oregon Tech prepares students to apply the knowledge gained in the classroom to the workplace.

Core Theme 2: Student and Graduate Success

Oregon Tech fosters student and graduate success by providing an intimate, hands-on learning environment, which focuses on application of theory to practice. The teaching and support services facilitate students' personal and academic development.

Core Theme 3: Statewide Educational Opportunities

Oregon Tech offers statewide educational opportunities for the emerging needs of Oregon's citizens. To accomplish this, Oregon Tech provides innovative and rigorous applied degree programs to students across the state of Oregon, including high-school programs, online degree programs, and partnership agreements with community colleges and universities.

Core Theme 4: Public Service

Oregon Tech will share information and technical expertise to state, national, and international constituents.

Program Alignment to Oregon Tech Mission and Core Themes

The Accounting program is hands on and technical, combining information technology courses with a broad accounting curriculum. Accounting courses emphasize hands on problem solving and use current technology when applicable.

Program Mission

The Accounting Option provides students with accounting education sufficient to enable students to be successful professionals, to pursue graduate education, and to pursue professional certification if they so choose.

Program Educational Objectives

- Graduates of the Accounting option can assess and apply their strengths in accounting.
- Graduates of the Accounting option can distinguish themselves as effective communicators.
- Graduates of the Accounting option excel in problem solving.
- Graduates of the Accounting option model ethical and professional behavior.
- Graduates of the Accounting option are prepared to pursue professional development opportunities and/or graduate education.

Program Faculty Review

Program Student Learning Outcomes and Objectives were reviewed by program faculty during Fall Convocation Program Assessment Meeting.

Department and program outcomes were reviewed by faculty during September 2016. The department reviewed the business core and related outcomes during 2015-16. Faculty also simplified department assessment assignments to better focus efforts. Two assignments - senior project and the case study - will now assess all department outcomes.

Showcase Learning Opportunities

Other learning opportunities include:

- Industry internships prior to senior project experience
- Professional development skills workshops
- Hands-on community projects incorporated into program courses
- Senior project an integrated capstone experience that requires project management, research and analysis to develop a solution for an actual business problem

Program History & Vision

Program History

The Management – Accounting degree was first offered at OIT in 1995, and provides students with a background in general business, financial accounting, tax accounting, auditing, and managerial accounting principles. It is designed to prepare students for careers in both public and private accounting. The degree also provides students with the accounting coursework required to sit for the Certified Public Accountant (CPA) exam and for the Certified Management Accountant (CMA) exam.

Meeting with Advisory Board

Program faculty held a meeting with their Advisory Board during the academic year.

Advisory Board Review

The Advisory Board reviewed the Program Mission and Objectives during the academic year.

On November 2, 2016, the advisory board met with program faculty. The 2015-16 department and program assessment results were reviewed with the board. Overall, the results showed improvement in several areas of senior project. While last year we had six department level assessments, as a group we found this amount of data was not helpful in determining how to make improvements. Therefore, beginning in 2016-17, we will be simplifying our plan and only assessing senior project and the strategic case study at the department level. The board supported this change. Additionally, the faculty shared the results from the business core update. The board supported proposed changes of the business core to maintain skills and knowledge that today's employers are seeking.

Program Enrollment

The Accounting Option (ACC) degree is offered at the Klamath Falls campus. Enrollment for the 2016/17 year was 19 students. This represents a one year drop from typical numbers of around 35 students in the program.

Attachment 1_Enrollment_5_Year_History_by_Major

Program Graduates

Eight (8) students graduated with a degree in ACC in June of 2016.

Attachment 2_Graduates_10_Year_History_by_Major

Employment Rates and Salaries

Based on data from the last three years, 83% are employed (employers include JELD-WEN, Collins Products, ISCO CPAs) and 6% have continued their education. Reported starting salaries average \$32,250.

Attachment 3_Grad_Data_First_Destination_3_Year_History_by_Major

Pass Rates on Board and Licensure Exam

In 2014, Oregon Tech ranked third for CPA exam pass rates in the state of Oregon, surpassing other major Oregon universities.

Closing the Loop

Describe any actions taken and re-assessment done during this academic year in response to assessment findings from prior academic years.

Program Faculty implemented actions during the academic year based on assessment findings from previous assessment cycles.

We have gathered assessment data following changes that indicates improvement in student learning.

We have gathered assessment data following changes that indicated further action is needed.

Changes Implemented

Case Study & Senior Project: During the 2016-17 academic year, the department streamlined assessment efforts focusing on the BUS478 Strategic Management Case Study and Senior Project. This focused assessment effort allowed faculty to work on areas that needed improvement. It was decided that we would no longer use the BSG Comprehensive Exam to assess our student learning outcomes. The action plan dictated that students should be pushed to expand skills with PowerPoint and to correct problems with Visuals, notably having too much information on slides. In 2016-17, the accounting students were assessed in ACC 435, Auditing, for Professional Communication (both written and oral). Students were requested to use knowledge gained in BUS 356, Business Presentations for guidance on visuals. Students were asked to use APA format for written communication as instructed in previous writing courses. With proper guidance from previous courses, this issue seems corrected.

Student Exit Survey: The main goal of the senior exit survey is to assess confidence and satisfaction rates of the program. The previous year's survey, students are asked how the management department has prepared them regarding each specific SLOs and PSLOs. This year we changed the question to ask students to rate their proficiency regarding with each specific SLO and PSLO. This question focuses more on students' ability rather than their satisfaction with faculty. Note that separate questions have been included regarding faculty and advising.

Program Student Learning Outcomes:

GAAP Concepts: Action plans were to evaluate the assessment assignment to be used for 2016-17. It was decided to use a practical consolidated financial statement problem for the assessment which was used in 2016-17.

Tax Concepts: Action plans were to focus more on the concepts of deductible business and rental expense which were the lowest area of performance on the 2015-16 assessment. In 2016-17, all ten students were proficient or highly proficient in the area of schedule C expenses and only one student out of ten was developing proficiency in the schedule E area. It appears the problem has been addressed.

Auditing Concepts: No specific action plans were made due to an adjunct teaching the course and data was lacking for the assessment.

Managerial Accounting Concepts: Senior project was used to assess managerial accounting and the only action plan was to discuss the assessment assignment. In 2016-17, Managerial Accounting was assessed in Senior Project again, but will be assessed in ACC 320 in the future, beginning in 2017-18.

Assessment Findings

Case Study: In 2015-16, the Case Study assignment only assessed department outcome 1, 2, and 5. The results for 15-16 had the department meeting measurement goal of 80%. During the 2016-17 academic year, the case study assignment was modified to encompass all department-level outcomes. The

department met goals in outcomes 1 and 4, and did not meet in outcomes 2, 3, and 5. Accounting performed well in all areas.

Senior Project: In 2015-16, faculty teaching senior project adopted a common project management approach using similar materials and process. During 16-17 academic year, the senior project faculty again met to discuss process, successes and challenges. The faculty agreed that the common structured approach was yielding better results. The department assessment results for senior project continue to improve in all areas. In 2016-17, in the three areas that results were not met, there was an improvement from the prior years.

Student Exit Survey: Despite the survey redesign, the results of the student exit survey have not changed from previous years. Overall students feel confident of their learning.

Program Learning Outcomes:

Tax Concepts: Using a tax return problem, half the students did not meet proficiency in the areas of Itemized deductions (Schedule A) and Employee Business Expenses. All other criteria on the rubric were met by all students, either as highly proficient or proficient.

Action plans are to add additional problems in class and as homework to address Schedule A
and Employee Business Expenses since they are closely related. Students will again be
evaluated in the 2018/19 year to gauge correction of the issue.

Auditing Concepts: Six out of nine students passed an Auditing and Assurance exam given to students in the Auditing Class. No specific concepts were assessed.

• Action plans are to expand the rubric to more criteria than a pass/no pass. Assessment will occur again in the 2018/19 academic year.

GAAP Concepts: All students were proficient or highly proficient in the preparation of the first consolidated financial statement in exam form. The first consolidation exam is much easier than the second.

Action plans are to use both consolidated financial statement exams as assessment
assignments. The second is more rigorous and covers more advanced concepts. The knowledge
gained would be beneficial for faculty in our program, especially to see the trend over time with
students.

Managerial Accounting Concepts: Since the Cost Accounting sequence was not offered in 2016/17, Senior Project was used to assess in this area. Not all Senior Projects included managerial accounting topics, but those that did were highly proficient in this area.

 Action plans include to find an assessment assignment and assess this PSLO in the Cost Accounting sequence in 2017/18 where all accounting students will be assessed.

Department Student Learning Outcomes Assessment Cycle

Assessment Map & Measure

- F Foundation introduction of the learning outcome, typically at the lower-division level,
- P Practicing reinforcement and elaboration of the learning outcome, or
- C Capstone demonstration of the learning outcome at the target level for the degree

For each outcome, programs should identify at least 2 direct measures (student work that provides evidence of their knowledge and skills), and 1 indirect measure (student self-assessment of their knowledge and skills) for each outcome.

For every program, data from the Student Exit Survey will be an indirect measure at the capstone level.

OIT-MGT 2016-17.1 Communicate the major concepts in the functional areas of accounting, marketing, finance, information technology, and management.

Office of Academic Excellence

The following data represents majors declared by student as of Fall 4th week. Students with multiple/dual majors have been reported under each major in which they enrolled; therefore the student headcount will be duplicated. A small number of students that declared a third major have now been included in this report. Data reported is combined for all levels and all locations.

Additional Notes:

Numbers may not add to 100 due to rounding

na=not reported, or not available due to small sample size

METHODOLOGY

Sample Frame 2016: 781 degrees awarded per FAST

Survey Response Rate: 49% Total Knowledge Rate 2016: 75%

Sources: Data collected from a variety of sources. Below, for 2016, in chronological order:

Grad Fair paper survey

Faculty senior exit survey

Career Services survey

Career Services followup with non-respondents

Faculty information from their contact with students

LinkedIn Profiles

Salaries of \$2,500 and below and \$250,000 and above were deleted.

Students with dual majors are included under each major

Known Outcomes 2016: 587

Known Outcomes 2013/2014/2015 combined N=1008

Known Outcomes 2014/2015/2016 combined N=1244
